Date: October 27, 2015
Subject: TEB HELICOPTER NOISE ABATEMENT ADVISORY

Teterboro Airport (TEB) has recently received an increased number of helicopter complaints, particularly in the communities immediately to the east and west of the airport. Please make sure to follow TEB's published arrival and departure routes (see attached) while avoiding overflights of neighboring residential areas whenever possible. Below are recommended practices for each of the TEB helicopter routes:

November and Whiskey Routes:

Avoid overflight of Wood-Ridge and Hasbrouck Heights residential areas west of NJ Rt. 17.

Echo Route:

Avoid overflight of Little Ferry residential area immediately east of the airfield. Traffic permitting, we recommend departing north towards I-80 before turning east over the interstate or once ATC assigned altitude has been reached. For arrivals on Echo, we recommend following I-80 and then approaching the airport from the north whenever possible.

Sierra Route:

Avoid overflight of Moonachie residential area immediately east of the airport. Traffic permitting we recommend flying over or just south of Moonachie Ave. when arriving or departing on the Sierra route.

Helicopters may be required to fly over TEB's close-in residential areas for air traffic separation. In these instances we advise operators to maintain an altitude of 1,000 ft. over the residential areas to reduce noise impacts.

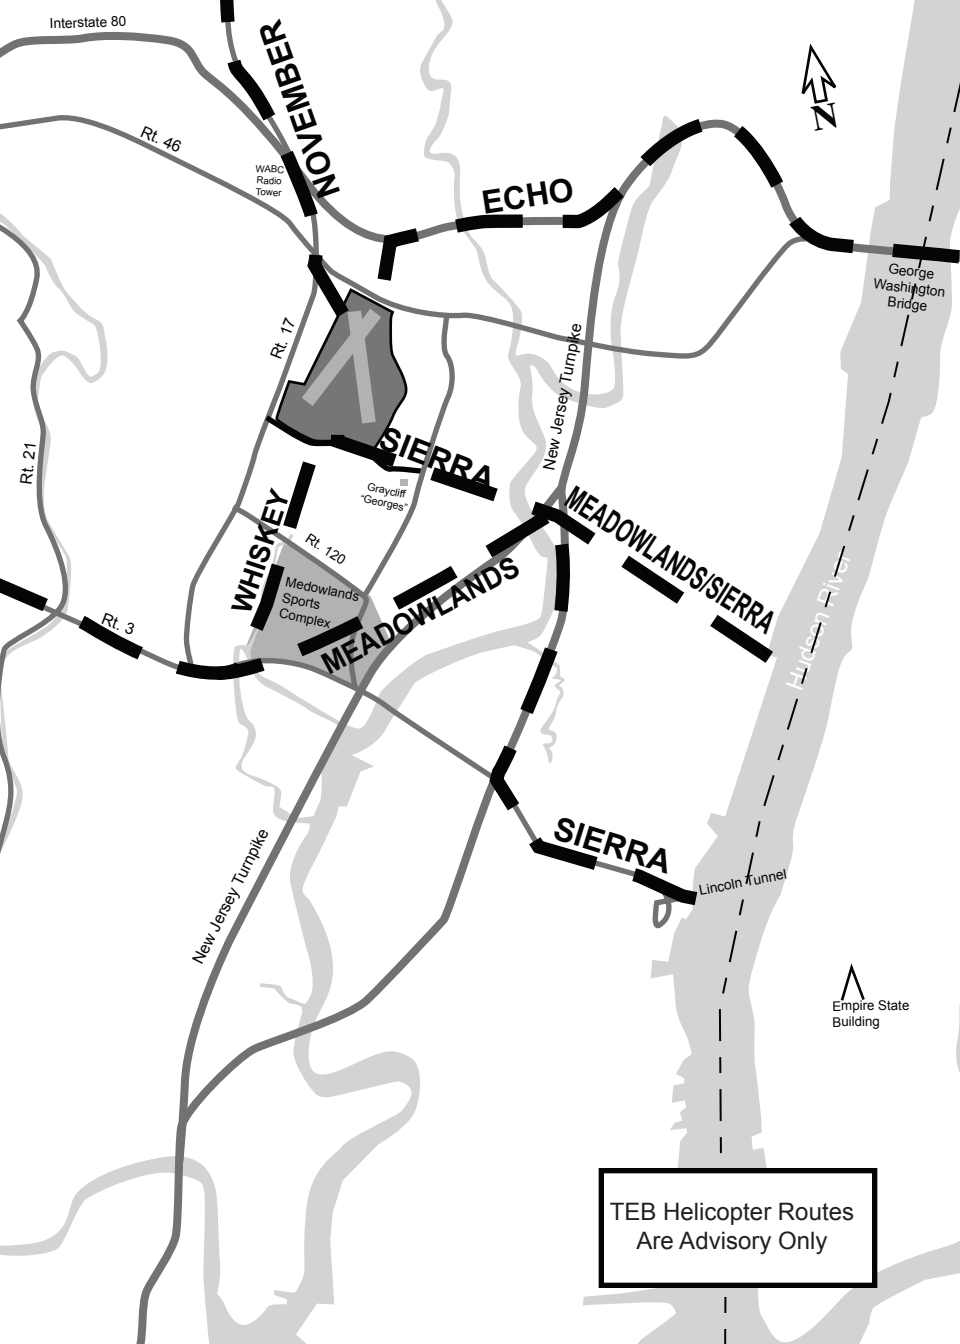

If you have any questions about this advisory please contact the Teterboro Airport Noise Abatement Office at (201) 393-0399 or at noiseoffice@teb.com
